Subject: Comments on Draft Tariff Exemption Form

Scott,

We have reviewed the draft "Part 6 - Affidavit in Support of Claim of DWR Power Charge Exemption Under Public Utilities Code Section 353.2," and we have the following comments:

- Modify the text in the first exemption qualification to read: "The Generating Facility uses a technology that has been certified by the California Air Resources Board (CARB) to meet the CARB 2007 Distributed Generation Emission Standards. **CARB certification documentation is attached.**" (We certify technologies, not facilities.)
- Change section 1395.1(b) in your proposed regulation to reference Health and Safety Code section 40405, not 404005. (Defining BACT.)

Thank you for your consideration of these comments. Please contact me if you have any questions.

Mike
